

Agile Delivery Team Structure

Extended Scrum Team
25 - 75%

Core Scrum Team
100%

The Agile delivery team structure maintains alignment with the broader enterprise and preserves agility among delivery teams

- **Domain Architect (DA*)** may consist of several architecture roles depending on the nature of the project e.g. Business Architect, Application Architect, Information Architect (Data, BI, Reporting), Technology Architect (Infrastructure and Telecom), and Information Security Architect
- **Program Architect (PA)** may be needed for a program that consist of multiple projects with dedicated Pods
