

Cloud Computing Planning Guide – Cloud Deployment Models

Cloud Deployment Models	
5	An IT capability as a service that providers offer to consumers via the public Internet.
6	An IT capability as a service that providers offer to a select group of customers (e.g. Federal Cloud).
7	An IT capability as a service that an IT organization provides to its own business (subset of private cloud).
8	An IT capability as a service offered to a business that is not hosted by its own IT organization.
